Re: Petition for Joint or Identical Pole Locations No. 30336314

Approved 5-28-21 M

Upon the request of the City to accommodate the reconfiguration of Mann Terrace, National Grid is proposing to relocate a pole at the intersection of Pine Street and Mann Terrace. JO Pole 15 is currently located 43 feet east of the centerline of the intersection of Mann Terrace and is proposed to be relocated 15 feet to the east of its current location.

DPW Engineering staff conducted a site visit on February 18, 2021 with a National Grid representative to request the pole be relocated to accommodate the 2021 Street Reclaiming project. The project includes conversion of the Maple Street at Pine Street intersection to an all-way stop and relocating the intersection of Mann Terrace at Pine Street easterly and converting approximately 60 feet of Mann Terrace to one-way travel westbound with a right turn only exit. The design improvements for the intersection are recommendations from the engineering firm Fuss & O'Neill, from the evaluation of the intersection geometry, vehicle and pedestrian patterns, traffic signage, street lighting, and sight distance. The intersection has a reported crash rate of nearly 4 times the statewide average for unsignalized intersections.

The proposed pole relocation is greater than 10 feet from existing water mains or service lines, drain pipes, sewer mains or service lines, and manholes. An existing catch basin on Pine Street is approximately 8 feet from the proposed pole relocation site. There are no trees in the vicinity of the relocation area and no apparent interference of trees with proposed overhead wires. The pole should therefore be relocated as proposed and there are no conflicts with city-owned utilities or trees.

A valid "Excavation/Trench Permit" is required prior to construction.

What skills and experience will you bring to this Committee assignment:

Though I recently moved to Northampton, I grew up in Williamsburg and attended Northampton High School. I feel deeply rooted in Northampton, and consider all of western Massachusetts to be my 'hometown'. I completed a degree in political science at Clark University, with a concentration in food studies. My rural background led me to doing research on agricultural policy under the farm bill, and at the local level with specific interests in urban planning and access. This year I joined the office of State Representative Natalie Blais, where I engage with planning related issues and policy on a daily basis in infrastructure, capital planning, and transportation. I have a strong network in the region regarding planning through FRCOG and PVPC, and I am looking for an opportunity to continue to learn and participate in my own community. As a young, queer woman I bring a diverse perspective to the board and I would hope to draw attention to related priority issues. Thank you for considering my application, and please don't hesitate to reach out if you have any questions.

Reduced lot line (RLL) developments are developments, or portions of developments, where house lots have a side yard setback of zero or more feet on a side lot line (the "reduced lot line"). Such a reduction in the standard side yard setback may be granted if the following standards A-E are met:

A. The reduced lot line side of a house lot:

1) Abuts permanently protected open space; or

2) Abuts the lot line of a lot which is under common ownership at the time the reduced lot line development is proposed and

- i. shares a party wall with the abutting structure on the commonly-owned lot;

ii. has a reduction from the standard setback such that the combined setbacks may be up to 10' less than double the standard setback.

B. A five-foot maintenance easement must be obtained or reserved by the owner of a house on a reduced lot line from the property owner abutting the reduced lot line in any development pursuant to A(1) or A(2)(ii) above where the setback is five feet or less to allow normal maintenance. Said easement may allow a roof overhang of up to two feet and in such case the easement shall allow roof drainage onto the easement area and sheet flow across the abutting property.

C. There shall be a minimum of four shade trees of not less than 1.5 inches caliper planted or maintained on each lot in accordance with the City's Tree List & Planting Guidelines, including two along the street frontage. (See also §350-6.5D)

D. Only one principal structure per lot is allowed in a reduced lot line development.

E. Any detached accessory structure on the lot must meet the standard setbacks for such structures.
